EXPERIENCE

Friendnpal, Lagos — Python developer

June 2023- PRESENT

I built chatbot api using openai dev kit with django-rest-framework,
and friendnpal web support bot using Wotnot.io..

EDUCATION

Lagos State University, Lagos — Mathematic B.Sc

Sept 2021 - (present)

Degree in Review.

Prestige Model college, Ogun State — SSC

August 2014 - July 2019

Obtained My Secondary School Certificate (SSC) and West Africa
Examination Certificate

PROJECTS

Ebay Script — *Web Scraping*

A web scraping project that uses selenium and request library to .Fetch
the price, name and url of Macbook on Ebay and avoids bot detection by
rotating the proxies which i I built using Threading, and a third party site

Tool and Technologies: Python, Selenium, CSV, Threading, Json

cl_xender — *websocket(FTP protocol).*

This project provides a simple file transfer mechanism between devices
Using Python socket library. It include a sender file and recipient file that
Is triggered by a main.py file

Tool and Technologies: Python, python-socket

SKILLS

Application server and web
development, Web
automation, Web scraping,,
API development and
Maintenance, Scripting and
System design.

TOOL

Python, RUST, JavaScript,
HTML, CSS

TECHNOLOGIES

JQuery, AJAX, SQL, Django,
Django-rest-framework, Fast
API, Selenium, BeautifulSoup,
requests Django-channels,
Daphne Web-Socket,
PostgreSQL, sockets,
Threading

AWARDS & CERTIFICATE

Microsoft digital Literacy -

Microsoft (2019)

Code For Employment-

Africa Development Bank

(2019)

Django Certificate Microsoft

Azure - Microsoft Azure

(2023)

IntroDuction to Python

Sololearn (2023)

LANGUAGE

English (Fluent)

Blog API — API

An API built using django-rest-framework that provides endpoints for fetching all blog post and posting comments uniquely to the blog post

Tool and Technologies: Python, django, django-rest_framework, Sqlite DB

E-mart — Ecommerce Site

An ecommerce platform built using HTML, CSS, Bootstrap, JavaScript, JQuery, AJAX, SQLite-DB, and django web framework which utilize Django built-in session authentication feature.

Tool and Technologies: Python, django, django-rest_framework, Sqlite DB, Paystack dev kit JQuery

Movie-downloading-bot — Web automation

This was built using selenium to utilize the automation

Capacity of Selenium to download Season 2 of Big Shot on Netnaija.

It first scrape the direct download link from the site, stores it a csv file and the read each url in the CSV, run it on the browser and click on the download button to download it

Tool and Technologies: Python, Selenium, CSV.

Film-Wharf — Web scraping, API, Frontend development

The aim of this Project to provide an Opensource platform to get access to movies, TV-series, K-drama etc to reduce the repetitive and slow task of searching for the user desired video.

So i built an API for this purpose that does not require authentication in order to keep users anonymous using django rest framework, and also a scraper that will populate the data_base, and a frontend for user interface (*this project is still a work in progress as at the time this resume was made*)

Tool and Technologies: Python, SQL, Selenium, Django, django-rest framework, HTM, CSS, JavaScripts, SQLite3..

 I agree to process this data for recruitment purposes and confirm its accuracy to the best of my knowledge.
