*(Fluent)*

## PROJECTS

### Store API

*Tools & Technology - Django, Django-Rest-Framework, SQLite3, draw.io, Paystack API*

REST-API

An e-commerce api that performs CRUD operation on user, carts orders and Products. Using token based authentication it prove to be effective

With paystack integrated into it as it's payment option.

Github <https://github.com/emekadefirst/storeapi>

### Pypstk

*Tools & Technology - http client, requests, Python*

REST-API

A python package that allows python users to integrate paystack API into their python project with ease.

Github <https://github.com/emekadefirst/PyPstk.git>

Pypi <https://pypi.org/project/pypstk/>

<https://github.com/emekadefirst/Film-Wharf-scrapper.git>

### Ebay-script

*Tools & Technology - , requests, csv, Queue and Threading*

WEB SCRIPTING

This Scripts scrapes Macbook data on Ebay and avoid server blocking and fetching proxies, sorting out bad proxies and rotate the proxies so as to reroute the request traffic

Github <https://github.com/emekadefirst/Ebay-script.git>

Check my Github for more <https://github.com/emekadefirst>

## CERTIFICATIONS

### Create data-driven websites by using the Python framework Django

*Microsoft Azure November 2023*

☒ I agree to process this data for recruitment purposes and confirm its accuracy to the best of my knowledge
